- Clinical Knee Fellowship (Sports & Arthroplasty) with the Australian Orthopaedic Association
- Post graduate trained in Hip Arthroscopic Surgery
- 10 years surgical Hip Arthroscopy experience
- Invited - National and International Hip Arthroscopy guest faculty surgeon / live Hip Arthroscopic Surgery

### WHAT IS THE ANTERIOR APPROACH?

The Anterior Approach is a minimally invasive approach used to perform a Total Hip Replacement. The approach utilises natural planes between muscle groups, so NO muscles are cut during the procedure.

### WHAT ARE THE ADVANTAGES OF THE ANTERIOR APPROACH?

*No muscles are detached during surgery which can result in:*

- Shorter hospital stay
- Shorter rehabilitation
- Reduced risk of dislocation
- Immediate post-operative muscle tone
- Decreased post-operative pain
- Reduced blood loss
- Faster return to daily activities

### AM I SUITABLE FOR ANTERIOR APPROACH HIP REPLACEMENT?

The Anterior Approach is suitable for most patients with hip arthritis but some patient's characteristics (anatomy, obesity, previous surgery) may be better suited to other hip approaches. This will be reviewed at the Adelaide Hip Centre.

# REFERRAL FORM

ONE SPECIALTY  
ONE FOCUS

PLEASE BRING THIS REFERRAL FORM WITH  
YOU OR YOUR GP CAN FAX IT TO 8275 3334

## ORTHOPAEDIC SURGEONS

- ☐ Dr Jonathan Cabot  
☐ Dr Mark Inglis  
☐ Dr Matthew Liptak

## PATIENT DETAILS

Patient Name		Sex (Circle) M / F
Address		
Postal Address (if different to above)		
DOB	Phone	Mobile
